EXPERIENCE

2021 - CURRENT

Software Developer
Apstro (Personal Project) - http://apstro.co.uk/

To accelerate my learning I have created and deployed a React Native astrology app using the following languages & framework(s): **React Native, JavaScript, Redux, Firebase, JSON, Firestore, NPM, REST APIs** and **Expo.**

Linked above, you can also take a look at a React website I've also created using: **React, JavaScript, HTML, CSS, React Router, React Helmet** and **NPM.** This website is mobile optimised and created with SEO and UX best practices in mind.

For both projects, I have used GitHub for version control and am comfortable using the command line

2020 - 2022

Tech Recruiter
Better Placed Tech

In this role, I specialised in software development in the North West, and have worked with a variety of companies, from unicorns to startups. This role has helped me gain a top-level understanding of digital products, technical terminology and improved my communication skills in a professional setting. Although this isn't a development role, I have gained a number of transferable soft skills like adaptability, initiative, teamwork and persistence.

2018 - 2020

Recruitment Consultant
DR Newitt - IT, Development & Digital Marketing

EDUCATION

2021 - CURRENT

Online & Self Taught Coding Syllabus

For the past year I have been following a coding roadmap to learn HTML, CSS, Javascript, React, React Native, UX, Redux and Node.js. This has involved the successful completion of the following online courses:
- The Complete React Native Course - Coursera
- Learn HTML, CSS, JavaScript, Redux and The Command Line - CodeAcademy
- Practical Javascript - Watch and Code
- CS50 - Harvard Computer Science Lectures
- Reading JavaScript and React documentation

2014 - 2016

Maths, Physics, Chemistry and Biology
Ashton Sixth Form (B-C)

2009 - 2014

GCSEs (A*-B)
Mossley Hollins High School

English, Maths, Physics, Chemistry, Biology, Business, ICT, History & Spanish

ABOUT ME

I am a self-taught software developer looking to turn my coding hobby into a full-time job. During lockdown, I started learning how to code and consolidated this knowledge by creating a React Native app, a React website and other small Javascript projects. As a member of the UX Design Institute, I am passionate about building user-friendly digital products through clean code and OOP and would love to apply this knowledge in a larger team.
